

# Bruce Beasley

## 3D Printed Sculpture

"In this show of his newest works, collectively called the *Coriolis*, and fittingly mounted at the gallery of the software giant Autodesk, Beasley has created an odd 'species' of things, one that to my knowledge has not been this effectively intoned in current or classic modern geometric sculpture to date: shapes that are believably and seamlessly both organic and engineered, both unapologetically a reflection of our technological age and uncompromisingly aesthetic in the strictest *art for art's sake* sense of that term."

– Marlena Doktorczyk-Donohue

The *Coriolis* collection will be on exhibit at the  
Autodesk Gallery

October 29, 2013 – February 7, 2014

Wednesday and Friday, 10am – 5pm

1 Market Street, San Francisco, CA 94105
